

S4000 Series

Electrified Industrial Rim & Vertical Rod Exit Devices

SDC's S4000 series features low-profile, high value electrified grade 1 exit devices with stainless steel construction. Not all perimeter doors have adequate overhang protection, exposing them to weather and corrosion. The S4000 is corrosion resistant and comes with motorized electric latch retraction and request-to-exit (REX) monitoring factory installed, making its application as easy as install - power - done.

- Electrified compact industrial design
- Motorized electric latch retraction and dogging
- Panic and fire rated devices
- Durable stainless steel construction
- Corrosion resistant
- Scratch, fingerprint and impact resistant touch pad
- High traffic use
- Low-energy automatic door operator compatible
- Request-to-exit (REX)
