## 12VR REGULATOR MODULE WIRING

All SDC power supplies are equipped with a filed selectable 12VDC or 24VDC output. The addition of the 12VR enables dual 12VDC and 24VDC output capability. The 12VR is a 12VDC, 500mA Regulated and Filtered Output Module. With the power supply output set at 24VDC for locking devices and components, the addition of the 12VR provides a separate 12VDC 500mA output for Access Control or other 12VDC devices.
