**IP100 Series**

**SDCs IP100 Power over Ethernet Capable Electric Latch Retraction Kit** enables electric access control and dogging of mechanical exit devices. When energized the motor retracts the exit device latch and pulls the pushpad into the dogged (depressed)\* position enabling momentary or sustained push and pull operation of the door. 12VDR @ 700/110 mA  
**The latch retraction mechanism may be activated by an access control, remote control device or building automation system. The exit device always provides uninhibited egress.**

\* Except where noted for latch retraction only
