

470 Series

No Touch Sensors

SDC's 470 series touchless switches use active IR sensor technology.

A simple wave of the hand in front of the 470 touchless switch activates the switch to control electric locks/strikes, magnetic locks or automatic door operators for entry or egress. 470 series touchless switches come standard with an adjustable 2"-7" activation read range.

The dual LED, illuminated sensor, clearly indicates status. The red LED indicates inactive status, which changes to a temporary green LED state to indicate activation. Ideal for, but not limited to, facilities that require contamination control. Touchless switches help **reduce the spread of infection and disease** in any application.

- Wave-to-open activation
- Active IR sensor technology
- Adjustable sensing range 2"-7"
- Adjustable relay activation time
- Illuminated dual LED sensor
- Durable stainless steel faceplate
- 8" wire harness
- Field selectable dual voltage

MODEL		LIST \$
474U	Single Gang, Active IR Sensor, SPDT, 630	87.00
474MU	Single Gang, Active IR Sensor with Manual Override, SPDT, 630	229.00
474DU	Double Gang, Active IR Sensor, SPDT, 630	150.00
