SDC introduces the expansion of their innovative product line-up to incorporate **ADA Compliant Solutions**.

Included are round and square Push Plates, as well as wall mount and full size Touch Panels. All types can be wireless or hardwired, bollard or wall mounted. Bollards can be surface or in-ground mounted to adapt to many different application solutions to meet accessibility guidelines.
Auto EntryControl™
Low Energy Swing Door Operator

SDC’s Auto EntryControl™ Swinging Door Operator provides hands-free, low-power, point of entry
door control with safe and reliable, electro-mechanical drive and slim-line design. The state-of-the-art
microprocessor-based unit is self-tuning and self-learning while offering non-handed operation, full mechanical
stops and a variety of interface options for sensors, push-plates, fire alarms and electrified locks.

FEATURES
Auto EntryControl’s™ non-pivot drive and combination of belt, gear and pulley requires less torque, requires
less power, absorbs more abuse, and is quieter than other automatic door openers while complying with all US
and Canadian ADA requirements. On-board diagnostics simplifies troubleshooting for ease of installation and all
AutoEntry Control’s™ can be easily configured for surface mounted push/pull or overhead concealed applications.

- ADA Compliant
- Complies with ANSI A 156.19
- UL - Certified for use as fire door operators
  (3 hour rating)
- Self-Tunning, Self-Learning
- Minimum 5 seconds from close to open
- Stays open for 5 seconds
- Force: 15 lbs - 6.8 kg
- Push or Pull (In door, Out swing)
- Activation: Knowing Act
- Optional Safety Device
- Power: 1A, 100W 24 VDC
- Non-Handed
- Extremely Quiet Operation

MODELS
AUTO136V  PUSH Operator for 36” Door Opening,
           Alluminum
AUTO236V  PULL Operator for 36” Door Opening,
           Alluminum
AUTO336V  Operator for 36” Door Opening,
           (1) PULL arm, (1) PUSH arm, Alluminum

AUTO136X  PUSH Operator for 36” Door Opening,
           Dark Bronze Powder Coat
AUTO236X  PULL Operator for 36” Door Opening,
           Dark Bronze Powder Coat
AUTO336X  Operator for 36” Door Opening,
           (1) PULL arm, (1) PUSH arm, Dark Bronze Powder Coat

Also available for 42” and 48” Door Openings as Single Operator - and 72”, 84” and 96” Door Openings as Double Operator

CERTIFICATIONS
- ANSI/BHMA A156.19 certified Standard For Power Assist And Low Energy Power Operated Doors
- UL 325 Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems or use on fire and smoke check doors
- Meets ADA – Americans With Disabilities Act
- In compliance with FCC 47 CFR Part 15 Class B emissions requirements (USA)
Access Controls: The Auto EntryControl™ Low Energy Operator may be used with electric latch retraction exit devices, electric strikes, and other electric locking systems. A time delay function is built into the control system eliminating the need for supplemental relays or controls. See Typical Systems Applications on pages 206 and 207.

Activation: The Auto EntryControl™ Low Energy Operator can be activated with the press of a switch. Virtually any form of “knowing act” can be used to initiate the operator making integration with existing systems easier. For the full line of activation devices that SDC offers see page 211 on.

Push and Go Option: With the flip of a switch, the Auto EntryControl™ Low Energy Operator can be configured to activate and open based on a slight movement of the door. Utilizing this option eliminates the need for supplemental activation devices but does not preclude their use.

Hold-Open Timer: Upon receipt of an activation signal, the operator will power open the door from the closed position. The door may be held in the open position up to 30 seconds (compliance with ANSI/BHMA A156.19 requires the door to remain in the open position for a 5 second minimum). Additionally, a “hold-open” switch is provided to hold the door open for extended periods.

External Function Switches: The Auto EntryControl™ Low Energy Operator is equipped with external function switches providing basic controls.

• Illuminated Power Switch: Illuminated to be visible at night, the switch controls power to the operator motor. The Auto EntryControl™ Low Energy Operator functions as a manual closer with power off.

• Mode Control Switch: A three function switch is provided for control of the powered function of the operator. “Day” mode will engage the operator for normal powered operation with activation by push plate, “Push and Go”, or signal from other “knowing act” device. “Night” mode disables the operator for normal powered operation; however, the operator can be configured to receive activation signals from a secure activation device such as a card reader for secure activation, generally from one side. Switching to “Hold-Open” mode will power the operator opening the door, holding it open indefinitely.

Obstruction Detection: During the opening cycle an obstruction function effectively reduces the possibility of personal injury in accordance with A156.19. Additionally this feature prevents damage to door and/or surrounding structures. After a stall time-out, the door will close.

Power-Close Option: This switched feature can be used to control exterior openings that require additional closing force to resist interior stack pressures and wind conditions that do not allow the door to close properly. Use this feature to reduce heating and cooling loss and save energy and money.

Single Button, Self Tuning: The automatic setup button allows for easy setup.

Easy Installation: The motor assembly is removable and makes the back plate installation easy. It is achieved through the custom designed mounting plate, which allows the motor-logic assembly to be detached from the mounting plate. Once the mounting plate is secured to header of door, the motor-logic assembly is easily re-installed and secured into the mounting plate without any excess lifting, and therefore not requiring any additional help.

  - Operator Non-handed
- Standard (In-swing) Pull Slide Arm Singles
  - Operator Non-handed

- Standard (Out-Swing) Push Arm Pair
  - Operator Non-handed
- Standard (In-Swing) Pull Slide Arm Pair
  - Operator Non-handed

- Standard Double Egress Pair - RH
  - Operator Non-handed
- Standard Double Egress Pair - LH
  - Operator Non-handed

### WARRANTY

Three years from the date of invoice

### PACKAGE INCLUDES:
- Auto EntryOperator™ Low Energy Operator (Non-handed)
- Standard Arm (PUSH side) or Track Arm (PULL side)
- One Spindle (PUSH 20 mm, PULL 35mm)
- Technical manual
- Signs
# Egress Controls

## HOW TO ORDER SINGLE MODEL

1. **SPECIFY MODEL**
   - **AUTO1**: PUSH Operator - includes 35 mm spindle, one motor assembly, PUSH arm
   - **AUTO2**: PULL Operator - includes 20 mm spindle, one motor assembly, PULL arm
   - **AUTO3**: PUSH & PULL Arms with 20 mm + 35 mm Spindles, one motor assembly

2. **SPECIFY DOOR OPENING WIDTH**
   - **36**: for 36" Door Opening
   - **42**: for 42" Door Opening
   - **48**: for 48" Door Opening

3. **SPECIFY FINISH**
   - **V**: 628 Aluminum (standard)
   - **X**: 710 Dark Anodized Aluminum

4. **OPTIONAL ARM EXTENSION**
   - **AUTO-AEV**: Arm Extension for PUSH arm for reveal >8", 628 Aluminum
   - **AUTO-AEX**: Arm Extension for PUSH arm for reveal >8", Bronze

5. **OPTIONAL SPINDLES**
   - **SP20**: 20 mm Spindle
   - **SP35**: 35 mm Spindle
   - **SP50**: 50 mm Spindle
   - **SP80**: 80 mm Spindle

## HOW TO ORDER DOUBLE MODEL (SPECIAL ORDER ONLY)

1. **SPECIFY MODEL**
   - **AUTO1**: PUSH-PUSH Operator - includes 35 mm spindles, 2 motor assemblies, 2 PUSH arms
   - **AUTO2**: PULL-PULL Operator - includes 20 mm spindles, 2 motor assemblies, 2 PULL arms
   - **AUTO3**: DUAL EGRESS Operator with 20 mm + 80 mm Spindles, 2 motor assemblies, 1 DUAL EGRESS, 1 PULL arm

2. **SPECIFY DOOR OPENING WIDTH**
   - **72**: for 72" Door Opening
   - **84**: for 84" Door Opening
   - **96**: for 96" Door Opening

3. **SPECIFY FINISH**
   - **V**: 628 Aluminum (standard)
   - **X**: 710 Dark Anodized Aluminum

4. **OPTIONAL ARM EXTENSION**
   - **AUTO-AEV**: Arm Extension for PUSH arm for reveal >8", 628 Aluminum
   - **AUTO-AEX**: Arm Extension for PUSH arm for reveal >8", Bronze

5. **OPTIONAL SPINDLES**
   - **SP20**: 20 mm Spindle
   - **SP35**: 35 mm Spindle
   - **SP50**: 50 mm Spindle
   - **SP80**: 80 mm Spindle
STANDARD APPLICATION

Auto 1
Standard Arm - PUSH Side

Auto 2
Track Arm - PULL Side
TYPICAL SYSTEM APPLICATION (SINGLE OPERATOR)

Auto EntryControl™ Low Energy Operator with PUSH–PULL

Operation: 115VAC
• Free ingress & egress using low energy operator or bypassing the operator and using door manually
• Door operator acts as standard door closer when entering or exiting manually

Material:
• Auto EntryControl™ Low Energy Operator
• 2 Door Actuators or Push and Go
• Local Power

Auto EntryControl™ Low Energy Operator with Concealed Mag Lock for Glass Door Applications

Operation: 115VAC
• Free entry when security system is shunted or off
• Entry after hours by card reader, which unlocks & activates low energy operator
• Free egress at all times by touching push bar or using inside actuator, which de-energizes mag lock and activates low energy operator

Material:
• Auto EntryControl™ Low Energy Operator
• Electromagnetic Shear Lock and Power Supply (PS)
• Electrified Pivot
• Touch Bar Sensor PUSH–PULL set
• Card Reader
• SDC Actuators
**TYPICAL SYSTEM APPLICATION (DOUBLE OPERATOR)**

### Auto EntryControl™ Low Energy Operator with Electric Strikes

**Operation:** 115VAC  
- Doors are to be closed and latched  
  (Example: Fire Doors)  
- Key switch shunts exterior actuator  
  (Example: After hours traffic control)  
- When not shunted, actuators will signal electric strike power supply and activate auto operators  
- From secure side, egress by manually pushing exit devices or using inside actuator to activate auto operators

**Material:**  
- 2 Auto EntryControl™ Low Energy Operator  
- 2 Vertical Rod Exit Devices  
- Electric Strike & Power Supply (PS)  
- Key Switch  
- 2 Actuators

### Auto EntryControl™ Low Energy Operator with Latch Retraction

**Operation:** 115VAC  
- Doors are to be closed and latched at all times  
- When activated, latch bolts are retracted and door(s) will automatically open  
- Non-rated devices can be dogged for push/pull operation

**Material:**  
- 2 Auto EntryControl™ Low Energy Operator  
- 1 Power Supply  
- 2 Electric Hinges  
- 2 Exit Devices with Electric Latch Retraction  
- 2 Actuators
**Auto EntryControl ACCESSORIES**

**Auto-IR**
Presence Sensor and Door Re-Activator

**FEATURES**
Auto EntryControl’s™ Auto-Detect Accessory allows re-activation of door before contact is made during the closing cycle, protecting slow-moving people as well as people trailing behind. It reliably detects stationary as well as moving objects in the swing path of an automatic door. When using the Auto-Detect, mounted on the application side of the door, the need for an extended hold open time is eliminated, allowing the door to begin the close cycle after the minimum 5 second hold open time has elapsed.

- Exceeds ANSI 156.19 standards by offering a contactless experience
- Proven active infrared technology (distance measurement sensor using the principle of triangulation)
- Guarantees smooth and safe operation of a door intended to be used by the elderly and disabled people. Sensor is only active following a knowing activation such as pressing a wall switch
- Following a door activation, the Auto-Detect remains enabled to allow continued automatic non-contact re-activation capability should someone remain in the door opening while the door is open or while it is closing

**MODELS**

**AUTO-IR36**  Presence Sensor and Door Activator 36”  **AUTO-IR48**  Presence Sensor and Door Activator 48”

**Auto-AE**
PUSH Arm Extension for Reveals Greater Than 8 Inches

WARRANTY

YEAR 5
Dual Switch Bollard Post
High-Low CBC compliant Bollard with Switch Plates Combo

Alternative to wall mounted access control or switches for entry doors. Bollard post provide visibility and meet accessibility guidelines. Practical solution for surface mount and California Building Code compliance.

FEATURES
- CBC Section 11B 404.3 code compliant bollard and switch plates
- Black HDPE mortised removable cap with secure transmitter mount (wireless transmitter optional and sold separate)
- Two 4-1/2” 'Push to Open' blue infill push plates, located at 7” and 36” centerline from floor
- 6” square post with 1/8” walls
- Surface mount (42”)

MODELS

CBC482A4U 42” surface mount, 6” square post, with high and low 4-1/2” SPDT switch plates
CBC484A4U 42” surface mount, 6” square post, with high and low 4-1/2” DPDT switch plates
Bollard Post
for Push Plate or Touch Panel

Alternative to wall mounted access control or switches for entry doors. Bollard post provide visibility and meet accessibility guidelines. Practical solution for surface mount or in-ground installation. Push Plate Switch and Touchpanel ordered separately.

**FEATURES**
- For use with Push Plates, Touch Panel Columns & Exit Switches (sold separately)
- 6” Square with 1/8” Walls
- Black HDPE Mortised Removable Cap with Secure Transmitter Mount (wireless transmitter optional and sold separate)
- Standard Single Gang Prep Located at 36” from Finished Floor
- Surface Mount (42”) or In-Ground Mount (54”)
- Weight 11.0 lbs

**MODELS**
- **BPS6** 42” Surface Mount, 6” Square Post
- **BPG6** 54” In-Ground, 6” Square Post

491 Emergency Door Release
Break Glass Emergency Exit

The SDC 491 Emergency Door Release Break Glass Station provides immediate unlocking of perimeter doors or interior doors that are equipped with fail-safe electric locks. The 491’s built in alarm may be used as a local door annunciator.

The SDC 491 is specifically designed for emergency door release and may influence the approval of an electric locking system. This type of Emergency Door Release may be preferred over a pull station since greater commitment is required to break the glass.

**FEATURES**
- Aluminum rod Blue housing with easy to read activation instructions avoids confusion with red fire alarm stations.
- The SDC 491 may initiate the release of an individual door or all doors on the same circuit.
- The SDC 491 may be mounted in a 2” deep single gang back box or double gang box with plaster ring cover. The SDC 491 may be surface mounted with a 491-BB surface mount back box.
