

# 918 Series

## Indoor Digital Keypads

SDC's 918 series of indoor standalone digital keypads are designed to control access of a single entry point for facilities with up to 500 users. Each user is assigned a personal identification number (PIN). Keypad entry of a valid one to six digit code activates one or both of the output relays which releases an electric door lock.

**918W models** are designed to interface with SDC's IPPro® or most access control systems, providing a standard 26-bit wiegand output.

### MODELS

**918** Indoor Self-Contained Keypad

**918W** Indoor Wiegand Output Keypad

### STANDARD FEATURES

- 12-key illuminated, moisture-resistant keypad
- Thick stainless steel faceplate
- Tamper-resistant screws
- Keypad programmable
- Tactile keys with selectable audible levels for key depression or output activation
- Adjustable audible annunciation
- Visual status indicators (LED)

#### SELF-CONTAINED KEYPADS ONLY

- 500 user codes
- 4 outputs, 2 relay and 2 solid state
- Outputs timed or latching (on/off)
- Assign entry PIN's to relays 1 and/or 2
- Choice of door sense or relay inhibit input
- Timed anti-passback, anti-tailgate
- Keypad tamper lockout
- Request-to-exit (REX)

## APPLICATIONS

- Single gang wall mount

### DUAL LED STATUS INDICATORS

- Configurable illumination: on, off, timed
- LED status: access, lockout

### SELF-CONTAINED KEYPAD PROGRAMMING OPTIONS

SDC's EntryCheck™ keypads includes a door sense/inhibit input feature. When programmed for "door sense", a door position status (DPS) switch wired into the input and detects a "forced entry" or "door ajar" condition. When programmed for "inhibit Input", a maintained switch or automatic timer wired into a the input will disable the activation of the main relay.

EntryCheck™ keypads also have a request-to-exit (REX) input for connection to an exit switch and/or fire access key switch for fire/emergency access. When access is granted, the shunt option is activated shunting alarm contacts on the door or gate. This prevents triggering of an alarm during authorized access.
