

NEW IP PRO™ WITH TWO ETHERNET PORTS: NETWORK EDGE – SAFE, SECURE, EASY TO IMPLEMENT

SDC IP Pro™ IP-based Single Door Access Controllers are now available with two Ethernet Ports for interfacing with an additional IP device. They allow expansion from one Standalone door up to a 100-door “Grid” without the headaches of costlier, more complicated enterprise solutions. Configure and manage every door from a single interface that grows with you.

- Single Door IP Controller expandable up to 32 doors
- Two Ethernet Ports allow for interfacing with additional IP devices like cameras additional door controllers, etc.
- Secure, built-in browser-based software, no software to install
- Manage from any PC and standard web browser
- Connects to existing network infrastructure
- Compatible with standard Weigand readers

- FREE PLUS PC-Client software to control up to 100 doors from a single PC
- Role-based access control software suite with different interface modules
 - PLUS Hardware - used by the installer to set up controllers, doors and user profiles
 - PLUS Manage - used by system administrators to facilitate database changes required on a day-to-day basis, and offers various reporting tools.
 - PLUS Server - used by system administrators to perform specialized tasks, such as database backups, firmware updates, importing/exporting users
- Live System events can be monitored from either module

FOR UP TO 100 DOORS WITHOUT ALL THE NETWORK HEADACHES.
