

# RCC Series

## Rack Mount Control Consoles

SDC's RCC series rack mount control consoles provide a flexible, economical method of centrally supervising and controlling multiple openings within a facility. Available in several configurations, RCC consoles allow monitoring of door and lock status, as well as control of EMlocks, bolt locks, electrified mortise locks, shear locks, delayed egress systems, electric exit devices and electric strikes. The modular design of the console allows for the selection of the specific functions required by simply selecting panels with the desired status and control features.

- Modular design for future growth
- Momentary (MO), maintained (MA) or three position switches
- Visual status indicator (LED)
- Local audible alarm\*
- Latching feature available\*\*
- Numbered heavy duty rocker style switches
- Console key lock\*\*
- Dual console interface

\*EA panel required for local audible alarm

\*\*UR4-8 microprocessor control relay required for console lockout.
