As America recovers from the COVID-19 pandemic, SDC is grateful for your continued support of our Access & Egress Control Solutions that are contributing every day to **The Great American Comeback™**.

When you recommend, buy or install one of our proven technologies, you're helping to define a path forward to a more self-sustaining and prosperous future for our customers, community and our country.

SDC's **Hands Free Door Solutions™** use touchless technology to minimize the spread of infection or contaminants so that no one ever has to touch a door again. They're ideal for retrofitting a business facility, campus or location to help meet government guidance and requirements for reopening as recommended by OSHA, CDC, state, county, local and other agencies.

It's important to continue to follow federal, state, tribal, territorial, and local guidance for reopening America. We've assembled a list of links to Resources and Guidelines to assist our stakeholders in preparing a Reopening Plan specific to their business needs to ensure the health and safety of their communities, customers and employees.

Please check the helpful links on the last page of this guide to access information on reopening policies for your particular business or organization. Guidelines are constantly being updated, so be sure to check with your local entities for their latest guidance and procedures.

Consider Offering Hands-Free Door Solutions

Now is the time for industry professionals to step up with their own touchless solutions as America responds quickly to COVID-19 restrictions being lifted. It can be as simple as offering our **Hands Free Door Solution™**, so that no one will ever have to touch a door again.

Imagine offering a hands-free hygiene system by simply pairing **Touchless Switches with the Auto EntryControl™ Low Energy Swing Door Operator**. By placing a touchless exit switch on the inside and outside of the doorway, the door operator can be activated by the wave of a hand for access and egress while still meeting fire & life safety requirements.

LOW ENERGY SWING DOOR OPERATOR

NO TOUCH
WAVE-TO-OPEN SWITCH

Simply qualify any high touch, high traffic door at entrances, meeting rooms, offices or bathrooms that can be upgraded to help businesses, facilities and campuses get safely up and running again. To learn more about building your own **Hands Free Door Solution™** for ADA or non-ADA Compliance and with or without Access Control Locking Hardware, visit our **Hands Free Door Solution™** page - www.sdcsecurity.com/HandsFree.

Designed, Engineered & Built in America

www.sdcsecurity.com • 1-800-413-8783

SDC has invested substantially to provide all our stakeholders with peace of mind because we believe in **The Great American Comeback™**. We have re-configured our production assembly process and all workstations to the recommended social distancing requirements and instituted new policies and instruction for operational distancing awareness to ensure effectiveness. This includes monitoring and enforcement of compliance as per the CDC and government guidelines. In addition, we have contracted a specialized daily cleaning service to perform workstation cleaning with hospital grade disinfectant.
